SUMMARY

Computer Science undergraduate who builds backend systems end to end with Python and FastAPI: REST APIs, JWT authentication and relational database design. Solved 150+ DSA problems and built interactive tools in JavaScript. Looking to ship production features, APIs and integrations in a high-ownership engineering team.

SKILLS

Languages: Python, JavaScript (ES6), C++, C, Java, SQL

Backend & APIs: FastAPI, REST APIs, JWT Authentication, SQLAlchemy, Pydantic

Frontend: HTML5, CSS3, Canvas API

Databases: MySQL, MongoDB

Tools & Platforms: Git, GitHub, Linux, Postman, VS Code

Core CS: Data Structures & Algorithms, Object-Oriented Programming, Operating Systems, Computer Networks, DBMS

PROJECTS

Smart Expense Tracker | [GitHub](#) | [Live](#)

Aug '25 – Sep '25

- Designed and built a RESTful backend in FastAPI with a modular architecture, covering user accounts, expenses, budgets and spending categories.
- Secured API endpoints with JWT-based authentication, password hashing and role-based access control.
- Modelled normalized MySQL schemas for users, expenses, budgets and categories using SQLAlchemy ORM.
- Enforced request validation with Pydantic and tested the API endpoints with Postman.

Technologies: Python, FastAPI, MySQL, SQLAlchemy, JWT, Pydantic, REST APIs, Postman, Git

Data Structure Visualizer | [GitHub](#) | [Live](#)

Jan '26 – Feb '26

- Built an interactive web app that visualizes arrays, linked lists, stacks, queues, hash tables and binary search trees.
- Implemented step-by-step animations for insertion, deletion, searching and traversal algorithms.
- Structured the visualization logic into modular JavaScript components on the Canvas API for easier maintenance and a smoother user experience.

Technologies: HTML5, CSS3, JavaScript (ES6), Canvas API

TRAINING

Skill Development, Lovely Professional University

Jun '25 – Jul '25

Linux Operating System | [GitHub](#)

- Completed hands-on training in Ubuntu Server administration, Linux storage management, Logical Volume Management (LVM), Access Control Lists (ACL), filesystem configuration, disk partitioning and storage expansion using VirtualBox.
- Managed users, permissions and filesystems in secure multi-user Linux environments.

ACHIEVEMENTS

- Solved 150+ Data Structures & Algorithms problems on LeetCode and HackerRank with consistent daily streaks, and applied that foundation directly in the Data Structure Visualizer project.
- Advanced to Round 2 of the Lovely Professional University Hackathon; worked in a team to design and pitch a real-world technical solution under time pressure.

EDUCATION

Lovely Professional University

Phagwara, India

Bachelor of Technology, Computer Science and Engineering; CGPA: 5.34

Aug '23 – Present

Guru Harkrishan Public School

South-West Delhi, India

Intermediate (PCM); Percentage: 70.5

Mar '22 – May '23

Guru Harkrishan Public School

South-West Delhi, India

Matriculation; Percentage: 68.5

Mar '20 – May '21
